# CANTON & COMPANY

Performance
Solutions

Maximize your investments in technology and talent

Technology solutions may promise an easy path to visualizing data, understanding patient populations, or succeeding in value-based care, but new tools are only as effective as the people and processes behind them.

Our team of technology, operations, and talent experts can guide your organization to the right resources to support your unique growth trajectory, then ensure their optimal use through process improvements, training, and team alignment.

We deliver the most value for your investments by supporting every step of acquisition: from developing models and evaluating solutions, to managing implementation and designing user workflows.

Healthcare organizations rely on our comprehensive expertise in:

- Technology assessments
- Solution evaluation
- Interoperability
- Implementation & workflow management
- Cloud migration & security
- Talent sourcing

For complex, enterprise health IT solutions like:

- Revenue cycle management
- Value-based care & ACO workflow
- Care & population health management
- EHRs and practice management
- Telehealth and remote patient monitoring
- Behavioral health
